Subject: Notification Of Contractor Approval For Tata Steel UK

Tata Steel UK Contractor Approval

This letter confirms Crane Rail Installations have been approved to undertake work on all Tata Steel UK sites.

Tata Steel now operates a single UK-wide Contractor Site Approval process that allows contractors to work on all Tata Steel UK sites subject to local requirements for a period of 3 years, before re-approval is required.

Please be aware that all Sub Contract companies must also be approved via the same process.

Please contact your local Tata contract owner for any site-specific requirements.

R Bishop
Contracts Engineer
